Special Issue Introduction

Gastric cancer is one of the most common malignant tumors worldwide. This special issue contains reviews concerning recent advances in research and treatment for gastric cancer. Research topics included cancer stem cells, circulating tumor cells, cancer microenvironment and liquid biopsy, while clinical topics included surgical management, chemotherapy, and other novel therapeutics.

Benefits

Open Access: the full-text of each published article can be accessed and downloaded from the journal website without any fee.

Free of Charge: we strictly follow international guidelines (COPE Ethical Guidelines for Peer Reviewers) and ensure rigorous peer review process.

Worldwide Readership: the readers of the journal are from more than 167 countries worldwide.

Wide Promotions: all published articles will be promoted on academic conferences, social networks for scientists or other various channels.
