Special Issue Introduction

Cancers arising from the gastrointestinal tract, including esophagus, stomach, colorectum, liver, gallbladder and pancreas, are frequently observed all over the world. Recent progress in molecular biological techniques facilitated understanding of the mechanism of cancer development and progression. This issue contains 9 review articles concerning the topics attracting a lot of attention in the field of gastrointestinal malignancies.

Benefits

Open Access: the full-text of each published article can be accessed and downloaded from the journal website without any fee.
