Special Issue Introduction

As cancer is a global epidemic which knows no borders, efforts to better understand biology and to control it should know no borders either. This issue contains a mixture of clinical and preclinical scholarly articles that have been written by scientists from America, Europe, and the Middle East. I hope that the fresh insights represented here will be appreciated by neuro-oncologists and brain cancer researchers across the translational spectrum.

Benefits

Open Access: the full-text of each published article can be accessed and downloaded from the journal website without any fee.

Free of Charge: we strictly follow international guidelines (COPE Ethical Guidelines for Peer Reviewers) and ensure rigorous peer review process.

Worldwide Readership: the readers of the journal are from more than 167 countries worldwide.

Wide Promotions: all published articles will be promoted on academic conferences, social networks for scientists or other various channels.
